e904

High-quality dynamic microphone with cardioid pick-up pattern.

Due to its compact design, the microphone is ideal for use with drums (toms and snares). It can easily be positioned in cramped space conditions (e.g. below the cymbals) and the supplied MZH 604 microphone clamp allows to precisely attach it to the rim of the instrument.

The e904 is also suitable for miking guitar amplifiers, percussions as well as brass and woodwind instruments.

A rugged full metal body effectively protects the microphone from impact damage.

The XLR connector turned by 45° allows the space saving positioning of the microphone in the case of angled connectors.

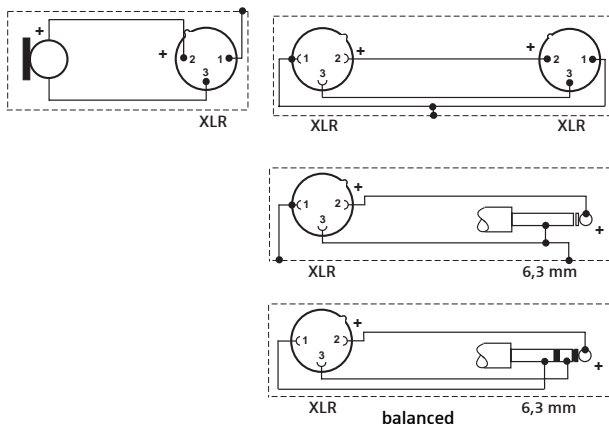

Features

- Extremely vivid, powerful sound with drums and percussions
- Sound can be shaped as needed to fit all styles of music
- Extremely rugged for rough stage use
- Humbucking coil protects against electromagnetic interference
- Gold-plated XLR connector (turned by 45°)

Delivery includes

- e904 microphone
- Pouch
- MZH 604 microphone clamp
- Instructions for use
- Warranty Certificate

Pin assignment of XLR-3 connector

Removing the sound inlet basket

Positioning the microphone

Drums

Position	Resulting sound	Commentary
	More fundamental tone, little overtones	Position on the drum: 3–5 cm above the batter head, the fundamental tone to overtones ratio can be adjusted via the angle.
	Less fundamental tone, many overtones	The most balanced results are obtained at an angle of 30–60°.
		Use of a second  904 for picking up the resonant head and the snares. If necessary, activate phase reversing for one of the microphones.

In order to prevent interference due to crosstalk between adjacent sound sources, try to position the microphone so that the interfering sound source is located in the angle area of the highest cancellation of the microphone (approx. 180°).

Accessories

The following accessories are available for the 904:
MZH 604 microphone clamp (Cat. No. 05299)

Specifications

Transducer principle	dynamic
Frequency response	40 – 18,000 Hz
Pick-up pattern	cardioid
Sensitivity (free field, no load)	2.0 mV/Pa (at 1 kHz)
Nominal impedance (at 1 kHz)	350 Ω
Min. terminating impedance	1 k Ω
Connector	XLR-3
Weight	125 g
Dimensions	diam.: 41 mm, length: 63 mm
